established because of Agriculture sector. After the industrial revolution new revolution come in the agriculture sector, for example new pestisid product was made by medicine companies, as a result of this inventions. [1-3].

2. Agriculture Contribution in National Economy

Agriculture sector productivity increased in the nineteen the tractor was invented for the increase of productivity of Agriculture sector. In this era of globalization many countries got the goal of development in the Agriculture sector. For example in African countries like Libya 1.8% Agriculture share of the GDP, Egypt Agriculture 11% of GDP, Saudi 14.8% Agriculture of the GDP, Ethiopia 33.5% Agriculture of GDP, in Somalia Agriculture sector 62.5% of total GDP. such countries are depend on Agriculture sector. In Asia like Nepal Agriculture 33.5% of GDP, Bangladesh Agriculture 12.7 of GDP. In such countries Agriculture sector have big share in GDP. Agriculture sector are the integral part of economy of third world countries. In many third world countries introduced the many agriculture reforms introduced. in many countries many schemes introduced regarding the increase the productivity. [1, 2, 5, 6].

3. Steps Regarding the Promotion of Agriculture

In many micro financing schemes regarding the Agriculture. In such countries government provide the debt relief in case of disaster circumstances. In USA and Canada they have the large industrialization, Despite of all they gave the special priority to agriculture sector. Japan is the leading industrial country Which have the large share of capital goods in the world economy. Japan is located in between the Indian ocean the Pacific ocean, Japan give incentive to agriculture sector regarding the financing and agriculture tools. in Australian continent agriculture farming is very important regarding cattle rearing. Australian government provide the incentive to animal farming regarding medication of animals and safe and security of farming. It is the need of hours that all the government of countries should pay the special attention to agriculture sector. Developing countries and developed countries Should provide the incentive to agriculture sector. If the government pay the attention to agriculture sector, this sector will create the employment opportunities to the poor population, one of the great impact of agriculture sector the country can achieve the self sufficient in the agriculture sector. The developing countries can earn the lot of foreign exchange through agriculture sector. Agriculture sector share the gross domestic product. Agriculture sector is very beneficial for humanity. if the government serve the entire nation they should give the special incentive to Agriculture sector. [6-8].

4. Agriculture Economics Education

Economics education is very important for every nation. in the case of economic education we can get the good status in the society Economics is the back bone of every country and society. Economics system provide the way how to get the goal of development. With the help of economics we can get the consumer price index. Economic data provide information regarding the national income and per capita income. [1, 3, 6, 9].

5. The Benefit of Economic Study

The benefit of economic study we can prove more beneficial for the society. Economic education provide the way how the all sectors can be developed. Economics data provide the information regarding the difficulties of nation. Economic education provide the method how to control the monetary expansion in the society. With the help of economic education we can measure the development of various sectors. In economic study the research is very important, when we study the economic researches we can get the lesson how the economic development achieved. [2-5, 7].

6. Agriculture Economic Education Importance for Youth and Student

In economic education and qualifications we study the various economic models which are implemented in various. In various countries they achieved the goal of development and growth with the help of good economic education and qualifications. Economics qualifications are base of every society. Economics is consist on various school of thought. Before some decades the some countries faced depression and inflation, because of good economist and good economic education we came over all economic problems. [6, 9, 10].

7. Agriculture's Economic Education and Society

Economics education is very vital for every society. Economics education are teaching approximately are taught in every university of world. It is the need of hour that we should get the economics education. economics education can bring the social revolution in any society. With the help of good economic system we can bring the financial discipline in our society. Financial institute are the back bone of economy. qualified economist run the system very well. Economist is the only person which can bring the social revolution in the society. [1, 5, 6, 9].

8. Agriculture Sector Role in the Economic Growth & Development

Agriculture Directly link with economic growth of the country. when we measure the Gross domestic product we measure the goods and services. when we estimate the Agriculture goods the Agriculture goods are included in the Gross domestic product. Agriculture sector are very vital for country economy. Country economy can be boost through the Agriculture goods. Agriculture goods provide the better infrastructure of employment to the nation. Agriculture sector provide the better employment opportunities to the majority of population. In various developing countries and least developed countries the literacy rate is very low as compared to developed nation. in various third world countries the education system is not satisfactory, in this regard the Agriculture sector play the vital role of economy. Economic development is the dream of every nation. Agriculture sector is the mother of economy. in various countries they are very backward in many areas of economy, such countries agriculture sector play the vital role in economy. In many African countries the Economic growth is very low. People of such countries depend upon the Agriculture sector. world financial institutions can play the vital role regarding the development of Agriculture sector. one world Agriculture development Bank should be established regarding the financial grant of countries, which are total depend on the Agriculture sector. Agriculture sector play the dynamic role in the industrial development. Agriculture sector is the main source of raw material to industrial sector. If the industrial sector and Agriculture sector work together for the development, and have the good working relationship the goal of the development can be achieved. Agriculture sector can boost and also increase the productivity of industrial sector. we can achieve the industrial growth if we maintain the balance economy in the country. Agriculture policy can be enhance the country economy. when we study the concept of Economic development we shall get the concept of equilibrium role of all sectors. Agriculture economics subjects should included in the syllabus of economics, this step will create the awareness of Agriculture sector. The role of Agriculture sector is very important in the country Economic growth. Economic growth help to increase in national income, percapita. Balance of payment can be improved through the Agriculture sector. Thus we can say that role of Agriculture sector in the world economy is very important. [7-10].

9. Research Methodology and Empirical Result

I conducted the research regarding the importance of Agriculture sector importance. I prepared the questionnaire regarding the importance of Agriculture sector and agriculture economics.

I talked with three categories regarding the importance of Agriculture sector and agriculture economy.

Table 1. Research regarding the Agricultural economics.

Categories.	Yes	no.
Business.	3.	1
Student.	8.	2
Teacher.	10.	1

Table 2. Research regarding the importance of Agriculture sector.

Cetogory	Yes.	No
Economist.	4.	0
Tax consultant	5.	0
Accountant.	6.	0

All the audience agree with my hypothesis that agriculture sector is very important and agriculture economics is very important for one society.

10. Conclusion

Agriculture is the integral part of every country economy. The highest growth of economic development with help of agriculture sector. Agriculture sector provide the way of economic growth and development. Agriculture sector is the heart of every economy. All the country should take the effective steps for the growth of Agriculture sector.
